

Build to Print, Wiring Harness Development, and PMA Solutions

Engineering Capabilities

- Build-to-Print
- Develop to Specification
- Project and Value Added Engineering
- Develop and Qualify PMA Designs
- SolidWorks Systems 2007, Autodesk Inventor, and AutoCAD 2011
- 60 inch Color HP Plotter (1:1 Scale Engineering Drawings)
- Customer Oriented

Value Added Engineering Support Services

Our engineering solutions include developing electrical wiring harnesses and cables from customer drawings or manufacturing custom wire harnesses based upon customer specifications. Supported by a newly expanded facility, CIA&D's design and manufacturing approach allows for on-time delivery of affordable, quality products.

Specializing in environmentally engineered, repairable designs we offer solutions for today's challenging market. CIA&D offers the expertise to address concerns regarding reliability, quality, and engineering of parts.

The diversity of the products manufactured at our facility has allowed us to develop interconnects with improved engineering, taking advantage of current high-tech advances in materials. For build-to-print customers, we offer value added engineering whereby we can assist in vetting design, material, and/or procedures.
